RAPID ANTI-BAC CLEANER

PROFESSIONAL FRAGRANCE FREE CLEANER AND SANITISER

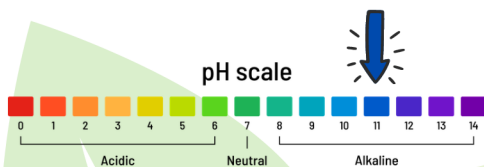

-  Odourless Food Safe Cleaning
-  Ready to Know Foam
-  60 Second Contact Time

Description:

Rapid Bactericidal Cleaner 750ml is a ready-to-use, odourless foaming bactericidal cleaner developed for hygiene-critical environments where effective cleaning and sanitising are essential.

Combining food-safe biocides with degreasing power, it helps remove everyday contamination while remaining fragrance-free and non-tainting, making it especially suitable for food hygiene areas. Designed for use on all water-washable surfaces, it is also ideal for awkward or frequently touched areas where trigger-spray application can improve coverage and ease of use. Simply spray on neat, agitate, then wipe or rinse away for a clean finish.

Useful Information:

Product Code:	12016
Product Colour:	Clear
Product Fragrance:	Alcohol
pH Level:	11

Directions:

Rapid Bactericidal Cleaner should be used undiluted for the cleaning and sanitising of water-washable surfaces, particularly in food hygiene areas where a fragrance-free, non-tainting product is required. Spray the product directly onto the affected surface and agitate using a cloth, sponge, scourer or other suitable cleaning tool to ensure full coverage. Allow a contact time of 60 seconds, then rinse with clean water or wipe away with a clean cloth to leave the surface clean and dry. For heavily soiled areas, clean the surface first and then re-apply the product to achieve the required bactericidal performance. Suitable for use on all water-washable hard surfaces, including awkward touchpoints and fixtures where foaming spray application improves coverage.

Use biocides safely and always read the label and product information before use.
