IMAGE AUTO GLASS DISHWASHER DETERGENT

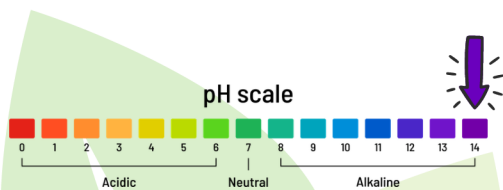

-  Industrial Strength
-  Strong Cleaning Performance
-  Powerful Formula

Description:

ProJanta Image Auto Glass/Dishwasher Machine Liquid is an industrial-strength machine washing detergent formulated for effective use in commercial glasswashers and dishwashers. Designed to be dosed in accordance with machine operating instructions, it can be used through dispensing equipment or added manually at 2-5ml per cycle, making it suitable for a range of professional washing setups. Its strong cleaning performance makes it a practical choice for busy kitchens, catering environments and other sites where reliable machine washing is essential.

This product is not suitable for use on aluminium or its alloys, so surface compatibility should always be checked before use. Classified as corrosive, it requires careful handling to help protect against severe skin burns and eye damage. Always use appropriate PPE and keep out of reach of children.

Useful Information:

Product Code:	17001
Product Colour:	Pale Yellow
Product Fragrance:	Odourless
pH Level:	14

Directions:

Image Auto Glass/Dishwasher Machine Liquid should be used in glasswashers and dishwashers strictly in accordance with the machine manufacturer's operating instructions. The product may be fed through suitable dispensing equipment or added manually at a rate of 2-5ml per cycle, depending on machine requirements and wash conditions. It is intended for industrial machine washing applications where effective detergent performance is required for glassware and crockery. Do not use on aluminium or its alloys.

When handling and using the product, appropriate protective gloves, clothing and eye or face protection should be worn, hands should be washed thoroughly after use, and the product should be kept out of reach of children.
