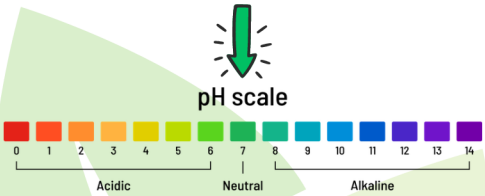
SUPERDET
DISHWASHER DETERGENT

- High Concentrate
- Economical Dosing
- Powerful Formula

Description:

ProJanta Superdet Liquid Detergent is a highly concentrated liquid detergent designed for both manual dishwashing and general cleaning tasks. Formulated with a blend of anionic surface-active agents, it delivers strong cleaning performance to help remove everyday grease, grime and soiling in kitchen and janitorial environments. Suitable for use in hot water for dishwashing and warm water for floor or general surface cleaning, it offers a versatile solution for routine cleaning across a wide range of settings. Its concentrated formula allows for simple dilution to achieve consistent results while helping make the product economical in use.

For greater convenience and reduced waste, a compatible dispenser can be fitted directly to the container for easier dosing. Always follow the recommended safety guidance during handling and use.



Useful Information:

Product Code:	1748
Product Colour:	Green
Product Fragrance:	Citrus
pH Level:	7

Directions:

Superdet Liquid Detergent should be diluted with water according to the cleaning task being carried out. For manual dishwashing, use 5ml per 5 litres of hot water and wash items as required, rinsing thoroughly after cleaning. For floor and general cleaning, dilute at 5ml per 5 litres of warm water and apply using the appropriate cleaning method for the surface or area being treated.

A suitable dispenser may be fitted directly to the container to support easier, more consistent dosing and help reduce product waste.

When handling and using the product, hands should be washed after use, and care should be taken to avoid contact with the eyes.
