AUTO NON-BIOLOGICAL NON-BIO LAUNDRY POWDER

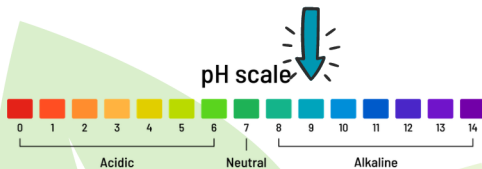

-  Non-bio Daily Washing
-  Delicate Wash Suitable
-  Automatic or Handwash

Description:

ProJanta Auto Non-Biological Laundry Powder 10kg is a non-biological laundry powder developed for reliable everyday cleaning in both washing machines and handwashing applications. Suitable for routine laundry care, it provides effective results across a range of wash types and is also suitable for more delicate washes when used correctly. Its simple scoop-dosing system can be adjusted to suit wash stage and water hardness, helping achieve consistent performance under different laundry conditions. This makes it a practical option for regular laundering where flexibility and dependable cleaning are important. For best results, always test for colour fastness before use.

It should not be used to soak silk, wool, leather or garments with metal fasteners, and enamel baths should also be avoided. Use responsibly and wear protective gloves during handling.

Useful Information:

Product Code:	18001
Product Colour:	White w/ Green
Product Fragrance:	Pleasant Linen
pH Level:	9

Directions:

Auto Non-Biological Laundry Powder should be used according to the wash stage and local water hardness to achieve effective everyday cleaning in both automatic washing machines and handwashing applications.

For pre-wash cycles, use 1 to 1.5 scoops per kilo of washing. In soft water areas without a pre-wash, use 2 to 2.5 scoops per kilo of washing, while in hard water areas use 3 to 3.5 scoops per kilo. Always test garments for colour fastness before use. Do not soak silk, wool, leather or garments with metal fasteners, and do not use for soaking in enamel baths.

When handling and using the product, protective gloves should be worn, hands should be washed thoroughly after use, and care should be taken to avoid contact with the eyes.
