CLEAR BEER LINE CLEANER

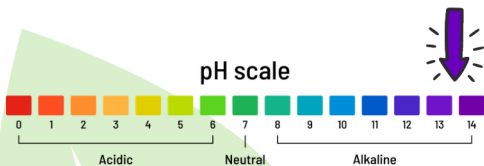

-  Maintains Quality Beer
-  Non-Tainting Formula
-  Pipeline Hygiene Control

Description:

ProJanta Clear Beer Line Cleaner 5L is a powerful beer pump and pipeline cleaner developed to remove bacteria and yeasts from dispensing systems, helping keep beer in top condition and maintain product quality.

Formulated as a non-tainting blend of caustic soda and sequestrants, it cleans and sterilises plastic and stainless steel beer pumps, pipelines and tanks effectively without affecting the taste of the product. Its colourless, odourless formula makes it suitable for regular line maintenance in breweries, pubs, clubs, restaurants, bars and nightclubs where hygiene and drink quality are essential.

Useful Information:

Product Code:	1904
Product Colour:	Clear
Product Fragrance:	Odourless
pH Level:	13 - 14

Directions:

CLEAR should be handled with extreme caution due to its high caustic soda content. Dilute 1 part product to 60 parts warm or cold water, noting that warm water will increase the cleaning action, then fill the beer dispense system completely with the prepared solution and allow it to soak for 30 minutes. After soaking, rinse the system thoroughly with cold water before re-attaching any beer lines. Litmus paper should then be used to check that the system has been fully flushed; if the paper turns blue, CLEAR is still present and the system must be rinsed again until no residue remains.

Suitable for cleaning beer pumps, pipelines and tanks in breweries, pubs, bars, clubs, nightclubs and restaurants, and for use on plastic and stainless steel beer dispense systems where effective, non-tainting cleaning is required.
