## POWER BAC

CLEANER AND DEGREASER FOR USE IN FOOD INDUSTRY

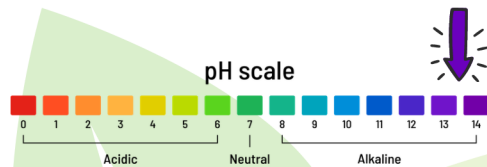

- Food-Safe Degreasing
- Odourless Sanitising
- Broad Spectrum Efficacy

## Description:

ProJanta Power Bac 5L is a concentrated, odourless bactericidal cleaner and degreaser developed for demanding food hygiene environments where both powerful cleaning and effective sanitising are essential. Formulated to remove heavy soiling, it cuts through blood, fat, food residues, grease and oils on surfaces such as stainless steel, stone, concrete and plastic. It kills 99.999% of bacteria and 99.99% of enveloped viruses, and passes EN 1276, EN 13697 and EN 14476, making it a reliable choice for hygiene-critical cleaning.

Effective against bacteria, yeasts and enveloped viruses, it is ideal for kitchens, bakeries, abattoirs, meat processing sites, breweries and food production areas.

## Useful Information:

Product Code:	240429
Product Colour:	Yellow
Product Fragrance:	Characteristic
pH Level:	12 - 14

## Directions:

Power Bac should be prepared by first filling and emptying a trigger bottle with clean cold water, then adding 1 shot, approximately 30ml, of product to the bottle. Spray the solution directly onto the area to be treated and work it thoroughly into the surface using a cloth. Allow a contact time of 5 minutes to achieve effective action against bacteria and enveloped viruses, then wipe away with a clean cloth. In food preparation areas, surfaces should be rinsed thoroughly with clean water after treatment and left to air dry.

Suitable for use in food hygiene environments including kitchens, bakeries, abattoirs, meat processing plants, breweries, snack manufacturing and food processing areas, and ideal for the degreasing and disinfection of hard surfaces such as stainless steel, stone, concrete and plastic where heavy soiling is present.
