POWER CLEAN

HEAVY DUTY CLEANER FOR GREASE AND GRIME

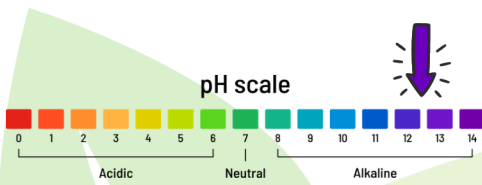

- Heavy Duty Grease Removal
- Versatile Dilutions
- Multiple Application Methods

Description:

ProJanta Power Clean 5L is a powerful heavy-duty cleaner formulated to remove grease and grime from most hard surfaces, making it suitable for both deep cleaning and routine maintenance tasks. Designed for use on floors, walls and other washable hard surfaces, it delivers strong cleaning performance when diluted correctly to suit the level of soiling. The formula can be applied by mop, machine, spray or wipe, making it practical for different cleaning methods and environments.

Supplied as a colourless, water-soluble liquid with a pH above 12.5, it should never be used neat and surfaces should always be rinsed thoroughly after use.

Useful Information:

Product Code:	260628
Product Colour:	Clear
Product Fragrance:	Characteristic
pH Level:	12.5

Directions:

Wear protective gloves when handling and using the product. For heavy-duty floor cleaning, dilute approximately 1:10, equivalent to 500ml per 5 litres of water, then apply by mop or machine, scrub the surface thoroughly and rinse well with clean water. For general-purpose hard surface cleaning, dilute approximately 1:150 (equivalent to 35ml per 5 litres of water) and apply by spray or cloth, leaving the solution on the surface for a few seconds before wiping away dirt with a clean damp cloth, rinsing the cloth frequently during use. Vertical surfaces should be cleaned from the bottom upwards to help avoid streaking, and once dry, surfaces may be polished with a dry cloth if required.

Never use the product neat and always rinse off after cleaning.
